COMPUTING SCIENCES ACCELERATED LEARNING

Gain the skills you need and complete your degree or certificate faster with customized, accelerated programming.

Four Computer Science and Information Technology (CSIT) programs are adjusted and augmented to help ensure your success. This process at JCCC goes by the name of Accelerated Collaborative Technology Training Services (or ACTTS).

Opportunities are available in the following programs:

- **Computer information systems/ computer programming –** benefit from computer language "bridge" course to accelerate your acquisition of multiple computer languages.

- **Information technology networking –** benefit from a NetLab environment that will provide you with remote access to lab equipment supporting CISCO training.

- **Web development –** full-time enrollment leads to completion of the Web technologies certificate in a cohort format in one semester.

- **Health information systems –** courses are "chunked" in five-week blocks providing for completion of multiple courses within a semester and delivered online.

View the course catalog for the area of study you are interested in for specific classes and sections.

We're here to ensure your success.

While participating in ACTTS, you can access:

- Career coach support to assist with academic and career success via development of customized learning plans

- Contextualized math modules available to support math content within CS/IT programs

- Self-assessment to assist with determining the most applicable CS/IT program for you

- Prior learning assessment for possible advanced placement and/or awarding of credit

- Opportunities for learning within a collaborative, experiential learning environment replicating that found in the industry

For more information, call 913-469-3453 to speak with a career coach.
