12. Overall evaluation of the instruction for this course.	0.0%	0.0%	15.4%	30.8%	53.8%	4.38

Additional comments for items 1 - 6.

Additional comments for items 7 - 9.

The instructor initiates very little interaction during lecture. He explains things very well, but it's a little dry.

Additional comments for items 10 - 11.

It was difficult for me for two reasons. One it was difficult to understand at times when our teacher was saying also some of the explanations for sub netting was difficult to understand because the accent and at times did not understand because his English.

He lectures and uses PowerPoint and the dry-erase board and explains things pretty well. He rarely asks questions during class except to answer himself. Not bad, but not great either.

Additional comments concerning this course.

This was difficult for me because the language barriers. I felt that it was difficult to listen and understand. This is what led to me not doing well in the class. I had to go seek external help which then made it more difficult when implementing the ways I learned to subnet because the teacher was explaining it in a way I was not understanding. More in class time is needed to present the material more adequately.
