1. Course Evaluation

1.6) Additional comments:

- He's a good teacher, and I like the lab assignments. He knows what he's talking about and can even comment with personal experience.

- He is very good professor, helpful and understanding!

- I initially struggled with understanding Linux, but Professor Al-Rawi's clear and effective explanations made the learning process significantly easier. His guidance has been invaluable.

- I wish the professor went a little faster during the lectures. He seems to rant a little bit too much off topic, and then go really slow the rest of the lesson. I would have time to get a whole lab done and read all the instructions and chapter before he was half way through with the lab. He was really nice and very helpful, just teaches too slow in my opinion

- Professor Al-Rawi I feel always does a good job of teaching. He tries to go in-depth as possible but also keeps in mind past areas where students have struggled with certain topics and always references these situations when coming to certain content to help prevent the same struggle from happening again. You can tell that he very much knows his material and that he cares about people understanding as well; this is shown by always asking if anyone has questions, and taking the time to address those questions when they do arise. I also very much appreciate that he takes the extra time to go to a student's machine when they have a question and brings it up so the whole class can see and better understand the troubleshooting process, as I feel that this is critical to actually learn and be successful as an IT professional (I currently work as an IT Support Specialist while going to class at JCCC, so I greatly appreciate this hands-on approach to answering questions in class and figuring out the solution for the problem right in front of our eyes instead of everything being hypothetical and/or "perfect" in a classroom and lab environment.). Thank you so much for all the hard work you put into your classes and this class, professor!
